## WORK EXPERIENCE

---

### Universal Infotech

June 2022 – Aug 2022

#### MERN Stack Developer Trainee

Indore, India

- Developed a News Web App using MERN stack with authentication, search, and category filters.
- Designed responsive UIs in React.js and managed backend with Node.js, Express, and MongoDB.
- Implemented JWT auth, tested APIs with Postman, and deployed apps on Render and Vercel.

## PROJECT EXPERIENCE

---

### AI Resume Screener

July 2025

Tech Stack: TypeScript, Node.js, Express.js, Ejs, OpenRouter LLM, Render | [Live Demo](#) | [GitHub](#)

- Built a smart resume evaluation tool using LLMs to automate candidate-job relevance scoring.
- Utilized OpenRouter's LLM APIs to automate candidate profiling and fit analysis.
- Enabled HRs/recruiters to upload resumes and receive instant, intelligent screening feedback with match scores.

### Portfolio Website

July 2025

Tech Stack: Next.js, Tailwind CSS, Vercel | [Live Demo](#) | [GitHub](#)

- Engineered a sleek developer portfolio with responsive design using Next.js and Tailwind.
- Improved loading speed with lazy loading and optimized image delivery.
- Deployed on Vercel with automated CI/CD and custom domain setup.

### Stay In School – Student Management System

May 2025

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS | [Live Demo](#) | [GitHub](#)

- Authored scalable RESTful APIs for managing student profiles, attendance, and academic records..
- Structured role-specific access levels for managing user permissions securely.
- Integrated Postman for testing and added backend logging to ensure system health and reliability.
